

## Section 1 “Current Data”

### 1.1

The screenshot shows a web application interface with a dark blue sidebar on the left containing 'Dashboard' and 'Charts' links. The main content area is titled 'Perform Data Analytics' and includes a 'Data Analytics' link in the top right. Under the 'Current Data' radio button, there are two empty dropdown menus, both displaying 'None selected'. A red 'View Analytics' button is positioned below the dropdowns.

### 1.2

This screenshot shows the same interface as 1.1, but with the first dropdown menu open. It displays a list of parameters: 'Select all', 'Temperature' (highlighted in blue), 'Dissolved Oxygen (DO)', 'pH', 'Salinity', 'Turbidity', 'Chlorophyll', and 'Sea Level'. The 'View Analytics' button remains visible.

### 1.3

The screenshot shows the interface with 'Temperature, pH' selected in the first dropdown and 'Shinghai' in the second. A third dropdown menu is open, showing 'Select all', 'Zhoushan', 'Shinghai' (checked), and 'Biejang'. The 'View Analytics' button is still present.
